

PRIVACY BREACH AND CYBER SECURITY

Designed for small business, our portfolio turn-key approach addresses cyber security exposures by providing broad and affordable coverage to protect your insureds. We provide flexible and innovative options which are available for first and third party including business interruption. Partnering with some of the strongest and most well-known carriers across the Country, collaboration and flexibility are key to success. We've helped partners write Cyber for the first time and replace or modify current programs.

Education, Risk Management and Breach Response are critical components to a successful program. We are pleased to partner with CyberScout™ and NetDiligence™, premier providers of identity theft and data breach management and resolution services. These partnerships provide carriers a choice. CyberScout™ provides integrated underwriting and agent training and a fully integrated claims and risk management platform with co-branded risk management tools to help insureds before and after a covered loss. NetDiligence™ provides the eRiskHub® portal which contains tools and resources to help insureds understand exposures, establish a response plan and minimize the effects of a breach on their organization. The portal includes access to an initial consultation with a BreachCoach® and access to a breach response team.
